

## HBCD and What the CDRA Does

Cyclic Aliphatic Bromide Cluster (HBCD) is a chemical no longer used in foam panel insulation, and even when it was used, it was a small part of the total number of foam panels manufactured. Today, the best estimates are that foam panels containing HBCD make up about .015 percent of the C&D waste stream, making it virtually non-existent.

That isn't stopping the U.S. Environmental Protection Agency from regulating the chemical after they determined the material is hazardous.

## Guidance On Environmental Justice

The CDRA's special task force on Environmental Justice has prepared a short document that provides members with the basics on what environmental justice is, how it got started, and what we will see in the future. To review the document, log in to the [Member Area](#) of the CDRA's website and scroll down to "Environmental Justice Explained".

## CDRA Member Spotlight:

**Terri Ward**

**VP of Sales & Business Development**

**TORXX**

**What materials do you recycle? Can you describe the volume and types of incoming materials you process?**

As an equipment supplier to the industry, I don't have a recycling facility. However, most of my work in C&D has been with mixed C&D recycling facilities ranging from 25-100 tons per hour. Starting with primary shredding (20 years ago) to prepare material for downstream sorting, I've also been involved in facility design and optimization, including automated recovery and secondary processing. Whether generating alternative fuel, converting fines for beneficial use, or mattress recycling, many of my customers have sought vertical integration to have more control over volatile end markets. With the TORXX Kinetic Pulverizer® technology, I'm now able to offer additional solutions for recovery and closed-loop recycling of building materials.

## Join NDA at Demolition San Diego

**February 26 – March 1 | San Diego**

The National Demolition Association (NDA) is hosting [Demolition San Diego](#). February 26 – March 1, 2022. This Annual Convention and Expo will convene professionals for education, networking, and more. As the industry gets back to work in earnest, don't miss your chance to reengage.

## Attend WasteExpo

**May 9-12 | Las Vegas**

CDRA members, you're invited to celebrate, innovate, and do business at WasteExpo! It's your best bet to get the education you need to hone your skills on how you do business and improve job performance. **Simply use code V11 to save big at [wasteexpo.com](#).** See you in Vegas!

## Industry News

Maine is attempting to stop the importation of C&D Waste into the state. It will be interesting to see how legal this stays:

[Lawmakers Endorse Bill that Would End Loophole Allowing Out-of-State Waste into Maine's State Landfill](#)

This is a good article on where New York is at on implementing an environmental justice program:

[New York Environmental Justice Leaders Propose New Definition for 'Disadvantaged Communities'](#)

Biochar testing has not caught up with the growing demand for its need. Here is one testing company's take on the various aspects of what needs to be tested:

[Biochar Process & Product Development in The Innovation Center](#)

Apeiron Construction magazine did an article on the CDRA that came out very well:

[Spreading the Word](#)

This is a good overall description of what is in the recently passed infrastructure bill:

[Environmental Regulatory Provisions Embedded in the Infrastructure Investment and Jobs Act](#)

## Welcome New Members!

Please join us in welcoming the CDRA's newest members:

The Association of the Wall and Ceiling Industry (AWCI) represents 2,400 companies and organizations in acoustics systems, ceiling systems, drywall systems, exterior insulation and finish systems, fireproofing, insulation, prefabrication/penalization and stucco industries. AWCI members are contractors, suppliers and manufacturers and those in allied trades.

Through the responsible development of innovative and sustainable building products, CertainTeed has helped shape the building products industry for more than 110 years. Founded in 1904 as General Roofing Manufacturing Company, today, CertainTeed® is North America's leading brand of exterior and interior building products, including roofing, siding, fence, decking, railing, trim, insulation, gypsum and ceilings.

For more than a century, Lehigh Hanson has been supplying cement, aggregates, ready mixed concrete, asphalt and other building materials to markets throughout North America. Today, as a part of HeidelbergCement, Lehigh Hanson's reach and capabilities are more extensive than ever.

The Mecklenburg County Solid Waste Division works in partnership with seven local municipalities to provide a high level of disposal, recycling, and composting services for municipal solid waste, construction & demolition (C&D) waste, recyclables, yard waste and other residential waste materials. The Mecklenburg County Solid Waste Division operates a C&D landfill, Material Recovery Facility, Compost Facility, four full-service convenience centers, and several recycling drop-off sites. Its C&D recycling operations include the diversion and recycling of drywall and concrete materials at its landfill facility.

Founded in 1971 and operating offices continuously in California since then, Webcor is known for its innovative and collaborative approach to construction, wide range of experience, cutting edge BIM/virtual building techniques, skill in concrete construction, and expertise in building iconic projects.
