

The Official Publication of the Construction & Demolition Recycling Association

CDRA Board of Directors President's Message

"I am a success today because I had a friend who believed in me, and I didn't have the heart to let him down." – Abraham Lincoln

As we near the end of 2024, our Association, through its robust Committees and Task Forces, is poised to tackle some of the tough challenges our membership faces locally, regionally, and nationally. Whether the discussions are focused on the need for more end markets, comments on LEED v5, or generating a platform everyone can agree on for proposed legislation on recycling rates or recycled gypsum EPR in California, our Association has garnered a substantial, respected voice among our industry peers because of all of you, our passionate membership. With the help of our Committee Chairs, seasoned facility operators, and supporting vendors, we are advancing our Core Values, Integrity & Transparency, Stewardship & Advancement and Knowledge & Collaboration.

Although we've always promoted the benefits of recycling construction and demolition debris, we now need to take a more proactive approach to working hand in hand with legislative figures to help educate them on the beneficial uses of recycled C&D materials in highway projects, agricultural uses, biofuels and in the reuse in new building products. We need lawmakers to understand that the use and reuse of recycled products is sustainable and achievable if realistic recycling rates are applied with incentives for contractors, manufacturers, and governmental agencies to want to use these resources versus depleting virgin material markets. To take on this proactive approach, I encourage all members to actively participate in our Legislative Committee meetings organized by Richard Ludt of IRS and Andrea Johnson of van der Linde Recycling.

In closing, I thank all the members, guests, friends, and colleagues who attended our Board Meeting in Portland this past September and the speakers and sponsors who attended our Shingle Recycling Forum in Louisville, Kentucky, held in October. These events showcased what our Association is about: collaboration, communication, information, and education.

As always, I am proud to serve the membership as the President of the CDRA and can always be reached at 609-833-0540 to assist you.

Respectfully,

John Thomas, Managing Member

Executive Director Letter

By: Terri Ward, Executive Director/CEO

Wrapping up my first year as Executive Director/CEO, I appreciate the numerous contributions and accomplishments made by the CDRA community. We have a resolute Board of Directors, vibrant committees with expert chairs, a diverse and growing membership, committed staff, and supportive allies.

2024 has been marked by impactful initiatives aligned with our strategic plan, focused on engagement, advocacy, growth, and delivering member value. Together we have strengthened our role as the national forum for C&D recycling. We can look forward with renewed optimism despite often challenging economic, environmental, regulatory, and business conditions.

Here are some highlights from the past year:

- **Collaborate. Innovate. Advance:** Our successful Shingle Recycling Forum brought together key stakeholders to share challenges and the opportunities to increase recovery of this important building material.
- **Strategic Growth & Member Value:** We've taken significant steps forward with our strategic plan, aiming to increase engagement and expand member benefits.
- **Gypsum Life Cycle Analysis:** In partnership with members and Innovative Technical Solutions, we completed the first phase of a recycled gypsum life cycle analysis. This study will help us quantify the environmental impact of recycled materials and guide future policy.
- **New Shingle Recycling Website:** A revamped shinglerecycling.org site is on the way, enhancing access to important resources for our members and the broader community.
- **Advocacy on LEED v5:** We provided comprehensive feedback to influence important changes to LEED v5, reaching consensus amongst a diverse group of CDRA members.
- **Conferences & Outreach:** This year, we exhibited and presented at numerous conferences, from Waste Expo to Greenbuild, promoting the importance of C&D recycling within our industry.
- **Policy Engagement:** CDRA engaged with policymakers across various states, contributing to legislative considerations around Extended Producer Responsibility (EPR), increased recycling rates, and third-party verification of recycling rates.

- **Best Practices in Safety:** We reviewed and awarded a record number of Best Practices in Safety Awards, highlighting our members' commitment to safety excellence.
- **Record Attendance at C&D World:** Our annual C&D World conference in Bonita Springs, FL, saw record-breaking attendance, showcasing the widespread commitment to advancing C&D recycling.

CDRA memberships allow all company or agency employees to benefit for one low fee. I encourage you to refer new employees so they can access important resources and participate in committees, online discussion groups, board meetings and more. In this way, we can ensure that all industry perspectives are represented.

As we look to 2025, I'm excited to continue building on our achievements. If you have any questions or ideas or would like to discuss sponsor membership opportunities, please reach out. This is YOUR association, and together, we'll keep advancing C&D recycling.

Thank you for your continued support, and best wishes for the year ahead!

Warm regards,

Terri Ward, MBA

COLLABORATE. INNOVATE. ADVANCE. One of the primary benefits of CDRA membership is being part of an organization driving professional, industry, and market change in recycling. Participating in a committee allows members to grow professionally and contribute directly to this change.

Safety & Risk Management Committee - Safety is Everyone's Job!

By: Leroy Taggart and Kelsey Thomas, Safety and Risk Management Committee Co-Chairs

Developed by like-minded members of the CDRA, the Best Practices in Safety Awards program offers member companies a roadmap to developing, improving, and measuring their own safety and risk management programs. In addition to offering this members-only program to members free of charge, we deliver added value by celebrating repeat award winners and fostering best practices as part of a friendly competition amongst employees.

Applications are now being accepted from companies interested in qualifying for Participant, Silver, and Gold-level award status for calendar year 2024. Those companies who are building their program from the bottom up are also invited to participate while being recognized for their efforts. Awards will be presented at the 2025 C&D World Annual Conference in Dallas, TX in March. Ready to get started? Did we mention that members can apply free of charge! Please use the QR code shown or apply online at www.cdrecycling.org/awards. Remember to apply early, but no later than January 10th, 2025.

In the coming months, our committee will explore safety challenges inherent to periods of colder weather, department of transportation

topics, and more. But there is always time to address other topic areas, so your suggestions are appreciated! Even better, join the nearly fifty companies who have sent representatives to attend our meetings in the past. As we like to say, safety and risk mitigation is everyone's job.

Besides serving as Co-Chairs of the Safety & Risk Management Committee, Kelsey Thomas is with Hainesport Transportation Group and Leroy is Senior Vice President, Property & Casualty of Marsh & McLennan Agency LLC.

Submit your awards application by January 10th

Submit Your Nominations for The Annual CDRA Awards

By: Peter Doherty

Interested in recognizing your fellow CDRA member at next year's C&D World? Nominate them for one of our annual awards! Visit www.cdrecycling.org/awards to get started and view the submission and eligibility requirements. Below are our current open awards.

- The Construction & Demolition Recycling Hall of Fame
- The CDRA Recycler of the Year
- The CDRA Member of the Year

Nominations are reviewed by CDRA leadership and confirmed by the CDRA Awards Committee. To submit a nomination for 2024, please do so by January 10th, 2025. Please email info@cdrecycling.org with any questions.

Shingle Recycling Committee Update

By: Dan Horton, Shingle Recycling Committee Chair

[Download the Contractor Recycling Guidelines](#)

We thank everyone who has engaged with the committee in what has proven to be quite a successful year. If you have not yet connected with members through this committee, keep in mind that it is not just for long-time recyclers. Those who have recently entered the market have already gained a great deal from getting involved this year. And there's much more to come. We are actively sourcing new topics and guest speakers for 2025 meetings. This year, members have had the opportunity to preview and provide feedback on the ShingleRecycling.org website, which is undergoing a significant transformation. This key industry tool is already the most comprehensive source of information on shingle recycling available, and new resources are being added. The entire user experience is also being improved, and new companies are being added to our online directory. We appreciate the support from our Board in approving a vendor, funding, and the volunteer and staff time needed to modernize and improve the site. And thanks to

staff member Heather Schuler and Paradigm for leading the team contributing to this project's success! One of the new tools being offered at ShingleRecycling.org is our brand new Contractor Recycling Guidelines publication. We encourage our industry partners—including recyclers, roofing manufacturers, distributors, and others—to actively share this valuable guide through internal promotions and point-of-sale (POS) opportunities to maximize its impact.

The Shingle Recycling Forum which took place in Louisville, KY was a huge success. We appreciate the participation of our conference organizer, exhibitors, sponsors and allied organizations CertainTeed, Owens Corning, Malarkey Roofing Products, Paragon Resource Management, Atlas Roofing, GAF, GIE Media, NAPA, NRCA, ARMA. We are gathering feedback on what appears to have been a very well-attended show. Our 10th Shingle Recycling Forum has likely paved the way for an 11th Forum in 2026!

Besides serving as Chair of the Shingle Recycling Committee, Dan Horton is Founder & Partner of ASR Systems LLC, Providence County, RI.

Renew Your Membership Today & Explore Your Benefits!

Maximize the value of your CDRA membership. Stay connected with industry leaders, access valuable resources, and take advantage of exclusive opportunities designed to help you grow.

So many ways to maximize your membership benefits

- **Innovate:** Update your profile to include your entire team, let's all work together to further the industry.
- **Collaborate:** Attend committee meetings to experience the ideas and influence cultivated by like-minded people.
- **Advance:** Utilize industry research and white papers to improve your operations and expand your knowledge.
- **Network:** Take advantage of deep discounts for in-person events

Renew now and be a part of the future of C&D Recycling!

Elevate Your Impact!

Explore sponsorship opportunities to increase your visibility, showcase your brand, and support the association's initiatives that drive the future of sustainable recycling in construction and demolition.

Contact Heather Schuler for more information.
schuler@cdrecycling.org

End Markets Committee Update

By: Will Hancock, Committee Chair, whancock@ccrscrap.com

The End Markets Committee meeting has been busy the past few months as guest speakers have brought a varied mix of useful information to our discussions. We thank speakers such as Dr. Hongyan Ma, Associate Professor of Civil/ Materials Engineering at Missouri University of Science & Technology, who spoke with our members about embodying Carbon in concrete and explained in detail the successes he has seen in recent pilot programs. James Gaspard from Biochar Now shared the latest updates and reviewed the firm's production process. Tom Miles, and Myles Gray, P.E. of the U.S. Biochar Institute promoted the sustainable use of Biochar and the importance of finding the right product for the right end market markets. Todd Byrum with Butler Paper shared information on some of the uncommon revenue-generating materials we see in our waste streams that recyclers might be overlooking. Charles Winum of Steinert US joined us to discuss the benefits of installing Eddy Current units into our MRFs. He offered Steinert's assistance in determining the appropriate eddy current for a facility's needs.

The variety of topics covered by this committee is impressive. However, it will take ideas from all of us to ensure that valuable topics and new end-market ideas continue to be explored. What new markets are you developing? Let us know, and your topic might be featured in a future meeting! Thanks to Co-Chair Lincoln Young for stepping up and agreeing to help lead the committee recently, and to all members for participating in our discussions.

Remember that committee members also benefit from candid, open discussions at the end of every meeting. And they can also access meeting recordings when they cannot make a meeting in person. We encourage you to join the committee online at www.cdrecycling.org/committees to ensure access to this valuable content. Send an e-mail to info@cdrecycling.org to be added to the committee roster today.

Besides serving as Chair of the End Markets Committee, Will Hancock is Chief Operating Officer for Cherry Creek Recycling, Thornton, CO.

Gypsum Recycling Committee Update

By: Terry Weaver, Chair of the Gypsum Recycling Committee

The Gypsum Recycling Committee's mission is to provide guidelines and other assistance in developing and expanding recovery and end markets for recovered gypsum. Over the years, companies have perfected methods of processing the material into useful end products ranging from soil additives to new gypsum wallboard. Supporting these efforts while also significantly increasing the volume of post-consumer gypsum recovered and recycled is extremely important to our members, legislators, and the communities we serve. Many of our recent discussions have been with these concerns in mind.

The committee has developed key considerations for the National Stewardship Council (NSC) on behalf of its members, for potential inclusion in forthcoming legislation expected to be introduced in the next legislative session. The expected bill is aimed at mandating drywall recycling in California, a market estimated to represent approximately 3.6 million tons of material. It's important to note that recommendations are only made when we feel that our members' opinions on a topic are clear and reasonable sample sizes have been obtained through polling and by other means. In recent discussions,

it has been made clear to us that practical, sustainable approaches to drywall recycling that weigh existing environmental goals with current industry capacity and reasonable timelines are preferred.

Our gypsum drywall Life Cycle Analysis (LCA) development continues with help from Innovative Technical Solutions. Our vendor expects to be able to complete the first phase of the work very soon! Thanks to all of our member sponsors, who are helping us to complete the comparison of the various end-of-life management approaches for virgin and recovered gypsum and develop preliminary assumptions and impacts for gypsum and the drywall paper bound to it. In addition, the entire value chain is being evaluated and findings relating to the current EPA WARM waste reduction model are also being examined.

We encourage all member companies interested in gypsum drywall to consider sending a representative to committee meetings in the New Year, or perhaps even sooner! Make plans to join our next meeting by sending an e-mail to info@cdrecycling.org.

Besides serving as Chair of the Gypsum Recycling Committee, Terry Weaver is President of USA Gypsum, Denver, PA.

Legislative and Regulatory Committee Update

By: Richard Ludt, Legislative and Regulatory Committee Chair

Thanks to Co-Chair Andrea Johnson and members of the Executive Committee for actively assisting with the planning and development of content for our committee meetings! Eric Pasewalk, C&D Zero Waste

Coordinator with the City of San Francisco, Michael Elliott with the Massachusetts Department of Environmental Protection, and Heidi Sanborn from the NSAC have all been recent speakers. Not only have they provided great learning opportunities, but they have also attracted new attendees and exposed our organization to people and entities who do not usually participate in our meetings.

CDRA members continue to benefit from our recent "legislative 101" topic, which might also lead to useful future committee or conference programming, and perhaps even positive interactions with your legislators! It's a fact that fostering long-term relationships with those crafting legislation is key to developing our early warning system. With this in mind, in the coming year, we will continue to empower and educate CDRA members in how to interact with their local and

state lawmakers, with the goal of helping to influence legislation at the earliest opportunity. And remember that our input as industry experts is imperative to the regulatory and legislative process. Those drafting these documents and creating regulations and laws have the best intentions but often do not have direct experience in the waste and recycling industry. They truly need us in order to get the best results for our industry and the communities that we serve.

Regardless of how active you have been in the past, there's no better time than now to get involved. You are welcome to reach out to Andrea, Executive Director Terri Ward, or myself. But an easy step to take right now is join the committee online at www.cdrecycling.org/committees to receive meeting updates and attend meetings in the future. Be sure to join us in 2025! And we do have one request... If you are aware of regulations and legislation happening in your State, please let us know.

Besides serving as Chair of the Legislative and Regulatory Committee, Richard Ludt is Director of Environmental Affairs at Construction & Demolition Recycling, Inc., South Gate, CA.

Marketing and Membership Committee

By: Heather Schuler, Membership and Marketing Director, CDRA

As we reflect on the past six months, it's clear that our momentum is stronger than ever! We've made significant strides in various areas, laying a solid foundation for future growth and success. Here are some

highlights from our recent achievements:

Development of ShingleRecycling.org and CDRecycling.org

We are excited to announce the development of our new websites, ShingleRecycling.org and CDRecycling.org. These platforms are designed to be comprehensive resources for our community, offering valuable information on shingle recycling and construction and demolition (C&D) activities. The initial stages have been met with enthusiasm, and we're eager to unveil these vital tools in the coming months.

New Onboarding Campaign

To enhance engagement and support for our members, we've initiated a New Onboarding Campaign. This initiative aims to provide new members with the resources and connections they need to thrive within our community. We believe that a well-informed membership is essential to our collective success.

Timely and Relevant Monthly E-Newsletters

Our commitment to keeping our members informed has resulted in the launch of timely and relevant monthly e-newsletters. These newsletters are packed with industry insights, updates, and key events, ensuring you stay connected and informed about the latest developments in the industry.

Planning for C&D World 2025

Registration is open! We have begun planning for the 2025 C&D World in Dallas, TX. The Exhibitor Prospectus has been released, and we anticipate selling out exhibit space and sponsorship opportunities rather quickly. Mark your calendars- March 11-14, 2025, in Dallas, TX!

2025 Renewal Season

Now is the time to log into your account and ensure your billing, key contacts, and all information is up to date! We look forward to rolling out new and exciting networking and learning opportunities in 2025. Register early to ensure your benefits continue into the next year!

As we continue to build on this momentum, we thank each of you for your support and participation in our community. Together, we are making significant strides in innovation in our industry.

Stay tuned for more updates, and don't hesitate to reach out with any questions or suggestions!

Conference Committee Update

By: Bernard Styer, Conference Committee Chair

The 2025 C&D World Website is Launched and Registration is Open!

During our most recent meeting, Chair Bernard Styer, Executive Director Terri Ward, and our volunteer team discussed marketing strategies, event programming, and logistics for the upcoming conference in Dallas, Texas. Notes from a very productive brainstorming session were shared, and programming ideas were further explored.

Potential locations for our 2026 conference were also discussed. However, our primary focus for the next several months will be on "Dallas" and giving our next event an authentic local feel, not to mention the best C&D recycling educational programming available. To register now or to learn more, visit www.cdconference.com. And remember that CDRA members save on conference registration. Exhibit space and sponsorship opportunities are filling up fast! Watch for details in the coming weeks related to conference schedule, confirmed speakers and more!

JOIN US! 2025 Events

One benefit of your CDRA membership is the discounts on registration extended to all company employees for all in-person networking and learning events.

We are always looking for opportunities to meet new companies and provide learning and networking opportunities for our members.

Are you interested in hosting a networking event at your facility or manufacturing plant? We seek opportunities to provide our members with regional learning and networking events.

Do you have a suggestion for a regional or national event where the CDRA might attend or exhibit. Please let us know!

Contact Heather Schuler to discuss any suggestions or opportunities [@schuler@cdrecycling.org](mailto:schuler@cdrecycling.org)

We hope to see you on the road in the coming months.

"A Baltimore Recycler of Mixed Construction Waste"

We Never Use Landfills!

OVERVIEW

Construction and Demolition (C&D) debris is a type of waste that is not included in municipal solid waste (MSW). Materials included in the C&D debris generation estimates are steel, wood products, drywall and plaster, brick and clay tile, asphalt shingles, concrete, and asphalt concrete. These materials are used in buildings, roads and bridges, and other sectors.
