CDRA President's Message

Happy New Year from the CDRA!

by Troy Lautenbach, President
Lautenbach Recycling
Mount Vernon, WA

For me the holidays were a time to slow down from work, spend precious time with my family, reflect on the prior year and strategize for the New Year to come. Now it's time to settle back in and get back to the hard work of being a part of the C&D recycling world.

The CDRA was hard at work last year for our members and the industry:

Regulatory Involvement:

- Responded to OSHA's employee silica exposure rule;
- Provided comments on revised state regulations; and
- Engaged U.S. EPA over sustainable materials management issues.

Member Engagement and Education:

- Co-located our conference last year in Las Vegas with ConExpo-Con/Agg;
- Welcomed 10 new Board members and held our first international board meeting in Vancouver, BC, Canada;
- Organized C&D World for February 11-13 2018 in Nashville! Registration is open;
- Signed the contract for C&D World 2019 in Brooklyn, New York; and
- Revised web site to help provide you better navigation and resources.

Looking forward to 2018, you can expect the following:

- Updated White Paper on the C&D recycling industry;
- New 50-state C&D regulation profile;
- New protocol for gypsum recycling;
- New Safety Awards Program, which will debut at Nashville C&D World; and
- Many other regulatory and member engagement activities and opportunities.

I would like to thank Jennifer Rzepka and her hard working staff at SAMI for all their help in taking care of our organization during the last three years.

I look forward to seeing you all in Nashville. Please come find me and let me know how we are doing. I always enjoy speaking with all of you and hear about all the various activities going on in all parts of this great nation and how you feel about the CDRA!

May 2018 bring you much success in business and family. **C&D**

Upcoming Events

Safety & Risk Management Update

*by John Schumacher, Senior Vice President
Assurance Agency
CDRA Risk Management Committee*

The CDRA Safety Awards program is officially in place! We are excited to be offering this new member program. Safety is always at the center of focus for C&D recycling companies and it is our goal that creating a method of measurement for this important area of operations will bring value to members.

12 member companies have submitted applications for the Safety Awards. These members will be recognized at the C&D World event in Nashville.

There are 14 different criteria areas in the self-evaluation and upon reviewing the applications, a trend was noted with scoring.

4 criteria areas stood out as having consistently high scores by the participants which included:

- Written Safety Policies

- Formalized Substance Abuse Program
- New Hire Safety Orientation
- Personal Protective Equipment Policies

4 criteria areas that stood out as having potential for improvement which included:

- Formalized Safety Inspections
- Fire Protection Programs
- Industrial Hygiene Testing for Air Quality
- Formalized Lock Out Programs

It is our hope that many member companies complete the self evaluation and use the results to determine where their safety improvement efforts should be focused for 2018. We look forward to presenting this program in Nashville! **C&D**

CDRA Announces 2018 Award Winners

The Construction & Demolition Recycling Association has announced two inductees to its prestigious C&D Hall of Fame, as well as C&D Recycler of the Year, and CDRA Member of the Year for 2018. The awards will be presented at C&D World 2018 Feb. 10-13 in Nashville.

C&D Hall of Fame

This institution is to honor those prominent leaders and pioneers in the Construction and Demolition Recycling industry who have made an extraordinary contribution to the industry and who have earned the respect of the industry. Additionally, to honor those who have made an extraordinary contribution to their community, both personally and professionally.

To recognize the achievements of those who have shown, by their example, the importance of promoting and defending the environmentally sound recycling of Construction and Demolition material through innovative processes along with encouraging and supporting others to build a career in the Construction and Demolition Recycling Industry.

To recognize leadership in advocating for the environmentally sound practices with the regulating agencies and legislative bodies governing waste regulations.

CDRA inducted two people into the C&D Hall of Fame.

Leonard Cherry—Mr. Cherry is President of Houston-based Cherry Companies, a wide ranging recycling and demolition firm that has 13 concrete recycling and stabilized materials sites. The company also processes asphalt shingles and tires. Mr. Cherry served on the board of the CDRA, and is active in the local community.

Ken Hoving—Mr. Hoving was President of K Hoving Companies in West Chicago, IL, until its purchase by Lakeshore Recycling Systems, where he stayed on as an executive until his recent retirement. A long-time member of the Chicago waste industry, Mr. Hoving built up the C&D recycling operation until it was the most modern one in the Chicago area. He served on the CDRA Board, including as Member At Large on the Executive Committee. He is well known for his far-flung charity work.

"Both of these gentlemen exemplify the best in the C&D recycling industry," said Troy Lautenbach, CDRA President. "Their service and innovation in the industry, as well as their work for the association and their communities, make them deserving of this honor."

C&D Recycler of the Year

The Operator of the Year is meant to honor those Recycling Operations in the Construction and Demolition Recycling industry who have made an extraordinary contribution to the industry through the one or more of the following criteria:

- Advancing business operations that result in increased recycling percentages
- Developing novel methods of marketing and conducting business
- Innovative practices in employer-employee relations

- Ensuring safer operations
- Protecting the environment
- Developing industry standards

A full service, multi-discipline recycling company in Austin, TX is the winner of this award. At its one site, the **Recon Services** facility provides concrete, mixed C&D, metals and shingle recycling, as well as roll-off service. Austin is a progressive city expecting the best in all types of recycling, and Recon is the only true full-service recycler in town. Owner Walter Biel is also progressive and open innovation, to the point he installed the first ever robotic sorting equipment on a C&D operation in North America. In addition, Recon is certified by the Recycling Certification Institute, providing its LEED customers an extra point no other company in Texas can.

CDRA Member of the Year

The Member of the Year will be selected based on extraordinary service to the mission of the organization and the C&D Recycling industry during the previous 12-month period.

John Schumacher, Assurance Agency is being recognized for the excellent work he did in creating from scratch a Safety Awards program for the CDRA.

The first Safety Awards will be handed out at C&D World 2018, Feb. 10-13 in Nashville. honors will be bestowed at that time, as well. **C&D**

Executive Director's Message

OSHA Inspects Mixed C&D Recycler for Silica Exposure

by William Turley, Executive Director
Construction and Demolition Recycling Association (CDRA)

A CDRA member reported that the local OSHA inspector came into his mixed C&D recycling facility for a typical inspection, and did find a few minor infractions. Easy to do with just about any operation. But apparently the federal employee also checked the facility's level of silica exposure to its employees, as part of the new regulation the agency started enforcing late last year.

We expected this testing at concrete recycling facilities when OSHA got around to the recycling industry, as the rule does cover the entire construction industry, covering a wide swath. Concrete is largely made up of silica, a ubiquitous material. Plus, recent news came out that the agency was down 40 inspectors, with no funds to replace them. So for OSHA to expend resources to investigate silica at a mixed C&D facility is an unexpected development.

Of course, at a mixed C&D operation there is less possible silica dust than at a concrete recycling operation, let alone other construction operations that are dustier, such as at concrete sawing and drilling. And in this instance the levels of silica turned out to be below the new, ridiculously low emission standards. But this shows that perhaps mixed C&D facilities will not be immune from scrutiny by OSHA on this issue.

Please let the CDRA know of any OSHA inspections for silica at your concrete recycling or mixed C&D facility. We have already developed information for concrete recyclers on the requirements of the rule. Please contact us at info@cdrecycling.org for more information.

CDRA Outreach

C&D World remains the premiere C&D event in North America. But as part of its mission to promote the viewpoint of C&D recyclers, the CDRA exhibits and participates in several other industry related events.

CDRA Mission Statement

CDRA promotes and defends the environmentally sound recycling of Construction and Demolition (C&D) material through a diverse and unified voice of members committed to sustainability.

For example, after C&D World February 10-13 in Nashville, CDRA will exhibit at the National Demolition Association meeting in Austin and WasteExpo in Las Vegas. CDRA will have representatives at the Biomass conference in Atlanta, Resource Recycling conference in St. Louis, and the Institute of the Scrap Recycling Industry (ISRI) in Las Vegas. This is in addition to EPA's Sustainable Materials Management in the Built Environment event held in late January, as was the Environmental Business Council's regional C&D Forum in Boston.

If you have a meeting you think the CDRA should be attending, please feel free to contact us at info@cdrecycling.org. **C&D**

Legislative/Regulatory Committee Report

by Ken Hoving
Lakeshore Recycling Systems
Chicago, IL

The CDRA's Legislative Committee has been actively monitoring or working on issues that affect the C&D recycling industry. Our work has an impact on every business in the sector, and we urge you to provide us input on any of these issues, as well as alert the committee to needed work on other issues.

- OSHA's employee silica exposure rule is now in effect, although we have not heard of any CDRA members being inspected for how silica exposure they subject their employees to. Your association has submitted questions on the rule for clarification to OSHA, and we will share those answers when we get them. This rule affects concrete recyclers, and for its members CDRA prepared information on how to comply with the new rule. Please contact CDRA headquarters at info@cdrecycling.org if you need that information.
- The U.S. Environmental Protection Agency's Sustainable Materials Management in the Built Environment project will be proceeding with a meeting of invitation-only stakeholders Jan. 30 to Feb. 1 in Washington, DC. The CDRA has been a major driver of this conference, as we want the focus to be more on end of life issues in green building and sustainable materials management. Another issue is "green" building materials now used that will have no end-of-life options outside of the landfill. We contend any product that does not have a chance to be recycled or reused should not be considered green.
- Dr. Tim Townsend's work on C&D fines continues at the University of Florida. He and his team are now visiting selected C&D recycling facilities across the United States to do more in-depth analysis.
- Another project Townsend's team is working is an update of C&D regulations of all 50 states. The project was first completed four years ago, and as we all know there are changes in those rules on a regular basis. For example, New York's Department of Environmental Conservation did a major overhaul of its waste regulations that was announced earlier this year, and those rules seriously affected C&D in the state. In addition to a regulation update, we will be adding information on what each state considers C&D biomass, and, its stance on C&D fines.

- A material some find challenging to recycle is gypsum. A few years ago, the European Union developed a protocol on the recycling of gypsum. While that document will not work perfectly in North America, the CDRA has tasked Dr. Townsend into revising the protocol into something we can promote over here. Note that gypsum, besides being difficult to recycle, also contaminates C&D loads, making them more challenging to recycle, or in the case of C&D fines, even to dispose of because of the odors that can be created in landfills.

Again, please let us know if any issues you think the CDRA should be working on. We would really like to hear from you, our members.. **C&D**

Recycling Certification Institute Update

LEED v4: Mixed C&D vs. Source Separation of C&D Materials

by Stephen M Bantillo

Executive Director, Recycling Certification Institute

A question came to us the other day regarding LEED points available for C&D recycling and whether or not source separated C&D was required. The source separation requirements are a bit of a tricky matter, but let us attempt to clarify with the assistance of the USGBC. While there are several LEED project categories to which this applies, the following is a general amalgamation of the requirements.

LEED v4 eliminated recycling credit for the use of alternative daily cover. It also created separate streams of C&D materials that would be counted as part of the recycling and/or waste reduction activities necessary for a project to earn one or two C&D-related points.

The first option (waste diversion) has two paths available: To earn one (1) point a project must divert 50% of the total C&D material and the diverted material must include three material streams. Or to earn two (2) points a project must divert 75% of the total C&D material and the diverted material must include four material streams.

The second option (waste reduction) has one path: A project may earn two (2) points by generating no more than 2.5 lbs of construction waste per sqft of the building's floor space. This second option is not relevant for our discussion here.

What is meant by the first option's two paths is that in addition to recycling mixed C&D materials, projects must also source separate C&D materials for recycling. An example of this would be placing bins onsite for metals, wood, drywall, etc. If you remember the repetitive breakfast cereal commercials that ran during Saturday morning cartoons, the outcome of the requirement is quite similar to the phrase "..... cereal is part of this nutritious breakfast", except in this case, recycling mixed C&D is a necessary part of this waste diversion equation.

The bottom line is this: Mixed C&D recycling is still embedded in LEED v4. And the MRpc87 Pilot Credit point is still available for projects taking their materials to facilities Certified by RCI regardless of the recycling rate. You can "Get Started" on your RCI Certification by visiting <https://www.recyclingcertification.org/>.

We understand there may be a myriad of logistical issues associated with the source separation requirement and anticipate ongoing dialogue on this topic. RCI welcomes the views of our subject matter experts who may send us an email at info@recyclingcertification.org. **C&D**

Audited. Validated. Certified.

What Is Your C&D Facility's Recycling Rate?

The Recycling Certification Institute has launched its online version of the Certification of Recycling Rates (CORR) program. This program provides credible, ISO-level third-party certification of C&D facilities' true recycling rates.

Can You Prove It?

CORR is the only program that provides a credible, third-party look at the true recycling rates. It is the only program recognized by USGBC for the new extra point under LEED for using a certified recycling facility.

Why Become Certified with RCI?

- Government agencies want accurate reporting of C&D recycling rates from facilities
- Many green building programs require recycling of C&D materials
- LEED Specifies use of CORR to gain an extra point for your clients
- Verify your facility's performance and have your recycling rate published with RCI
- Give your facility a marketing edge over the non-certified facilities

CORR is administered by the Recycling Certification Institute. For more information, including scheduling a recycling rate certification or to register your facility with the Institute, go to www.recyclingcertification.org

Awards

C&D World

Every year the Construction & Demolition Recycling Association holds a prestigious awards ceremony honoring individuals in C&D recycling who have made significant contributions to the industry. Awards presented at the association's annual membership meeting during C&D World, March 8 in Las Vegas, Nevada.

Construction & Demolition Recycling Hall of Fame

This institution honors those prominent leaders and pioneers in the Construction and Demolition recycling industry that have made extraordinary contributions to their community, both personally and professionally, and have earned the respect of the industry. It serves to recognize the achievements of those who have exemplified the importance of promoting and defending the environmentally sound recycling of Construction and Demolition material through innovative processes and have encouraged and supported others to build a career in the industry. Finally, the Construction & Demolition Recycling Hall of Fame recognizes leadership in advocating for environmentally sound practices with the regulating agencies and legislative bodies that govern waste regulations.

Honorees

- **2018: Leonard Cherry**, Cherry Companies, Houston, TX
Ken Hoving, Lakeshore Recycling Systems Inc., Morton Grove, IL

JOIN THE CDRA

Construction & Demolition
Recycling Association

DEDICATED TO ADVANCING THE INDUSTRY

Becoming a CDRA member offers your business support and resources that can't be found elsewhere. **The CDRA promotes and defends the environmentally sound recycling of Construction and Demolition (C&D) material through a diverse and unified voice of members committed to sustainability.**

CDRA members are an important part of association efforts as we focus on the future of C&D debris recycling over disposal.

CDRA members process millions of tons of: Asphalt, Concrete, Gypsum, Metals, Wood, Shingles, and more...

CDRA FOCUS

Founded as the Construction Materials Recycling Association (CMRA) in 1996, the association adopted the name Construction & Demolition Recycling Association (CDRA) in 2013 to best reflect its membership base: private sector businesses, public sector agencies and vendors to the C&D recycling market. There are a broad range of industries represented, including construction, demolition, public sector services, waste management services, rock and building materials companies, road construction companies, and more.

HELP YOUR BUSINESS STAY CONNECTED TO THE FOLLOWING:

- Regulations and Legislation that affect your business
 - » Support with pending rules and regulation lobbying

10/2017

Construction & Demolition Recycling Association 2018 PLEDGE CARD

Regulations and legislation affect the C&D recycling industry strongly, in both a positive and negative manner. The CDRA promotes the viewpoint of C&D recyclers to regulators and legislators across the United States. By becoming a pledge member, you help us achieve our goal to make sure the message of the economic advantages of recycling, as well as the environmental advantages, are brought to the attention of policymakers at all levels.
